

1. Neglect in the golden age of space exploration
2. I am interested in how engineering catastrophe's led to iconic and historical flight failures and if human neglect had anything to do with it.
3. Inform and explain will help deep dive into the information and avoid emotion or bias
4. Were there human factors that led to famous rocket failures
5. I am aware that there were in fact atleast a few instances in which rockets exploded or crashed due to poor engineering and neglect
6. I will primarily look through archives and articles

7. Sources of blame for Rover failure by Alan Williams, Will Mawby, Sandy Davidson, and Ashley Mote

Will be used to make claims about fault for the rover failure

Essay a Call for Quality by Allen R. Stubberud

Will be used to back and build upon previous claims

Aerospace Insurance 'Disasters' by John Moore, City Correspondent

Serves as a deeper dive behind the scenes of the industry

8. I will probably use a timeline
9. I am concerned about other coursework falling on the same week as this project
