

Will Buziak

223 Highwood Court 

(808)-342-0160 

willbuziak@gmail.com 

Senior in mechanical engineering with extracurricular studies in computer science with the intent of pursuing a graduate degree in computer science. Current undergraduate research position studying CFD methods for Li-ion fuel cell applications.

Why Will Buziak for Altec?

Experience working in environments pertinent to Altec business:

Prior experience working in manufacturing setting. Coming from a process engineering environment will help me have an idea of the processes utilized to manufacture the components that I design.

Serious interest in a career with Altec:

Moving forward I seek to hone my technical skills with solidworks and develop a career in the design field. Additionally, I would like to continue my computer science studies and broaden my horizons beyond the typical mechanical engineer.

Skills

Solidworks • Process Engineering • Computer programming skills • Siemens PLC

Programming • C/C++ • Conversational Spanish •
